DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

- I, claims 1-18, special technical feature: asymmetrically positioned transducer.
- II, claim 19, special technical feature: Cl_2He etch keeping electrical property.
- III, claims 22-28, special technical feature: modulation by changing Lorentz force.
- IV, claims 29-31, special technical feature: particular gauge factor G .
- V, claim 32, special technical feature: iteratively adjusting Fermi level.
- VI, claims 33-51, special technical feature: split signal to 2 NEMS & recombining.
- VII, claims 52-56, special technical feature: submicron SiC NEMS beam.
- VIII, claims 57-63, special technical feature: tuning with constant Lorentz force.
- IX, claims 64-66, special technical feature: particular $\alpha(\lambda, \sigma, R_L, \omega)$.
- X, claims 67-71, special technical feature: forming beam by 2-step etch.
- XI, claim 72, special technical feature: NEMS of different resonant frequencies.
- XII, claim 73, special technical feature: NEMS forming optical diffraction grating.
- XIII, claim 74, special technical feature: NEMS with analyte-responsive layer.
- XIV, claim 75, special technical feature: NEMS with IR-sensitive layer.
- XV, claims 78-83, special technical feature: thinning layers to retain quantum well.

Art Unit: 2811

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

A requirement for restriction under unity of invention in national stage application submitted under 35 U.S.C. 371 is proper when two criteria are met: (1) a listing of different groups of claims is made; and (2) lack of unity identifying the unique special technical features of each group is explained. See MPEP § 1893.03(d).

The inventions listed as Groups I-XV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features because each group is characterized by a different contribution that each invention within that group, considered as a whole, makes over the prior art. See MPEP § 1850(II).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement be traversed (see 37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

Art Unit: 2811

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
